

CARAVELLE RANCH BIRD LIST

Caravelle Ranch Wildlife Management Area

Florida's Wildlife Management Areas and Environmental Areas are home to an incredible diversity of birds. A continuous turnover of species in response to migratory movements ensures birders ever-changing experiences matched to the seasons.

We have prepared this checklist of birds to help you keep track of our spectacular and precious birdlife.

You may also consult on-line with FWC's Breeding Bird atlas data (MyFWC.com/bba).

Symbols Used in This Checklist

Type

- species confirmed on this site
- species probably occurs on this site, based on habitat, range and (usually) confirmed occurrence in nearby regions.
- exotic (non-native) species

Seasons

Spring	March-May
Summer	June-August
Fall	September-November
Winter	December-February

Breeding

- ▲ Species is known to breed in the area
- △ Species probably breeds in the area

Birds occurring near the WMA/WEA, but not actually recorded within its borders, are counted on the list if suitable habitat exists and if reasonable probability exists that the bird will occur there in the future. Thus, very rare birds recorded outside the WMA are not included on the list, but common birds are.

How you can help

This checklist is just a starting point. We are counting on you and other birders to let us know if you note additions or changes in status to species on this list. Please send corrections to:

This list was compiled for the FWC’s Office of Recreation Services by Adam Kent, based on site visits, previously compiled bird lists from the area or nearby, input from biologists and birders familiar with the site, and habitat data. Dr. Karl Miller, Avian Coordinator for Landbirds, Florida Fish and Wildlife Conservation Commission, assisted with the design of the checklist.
