About Responsive Management	191

INTRODUCTION AND METHODOLOGY

This study was conducted for the Florida Fish and Wildlife Conservation Commission (hereinafter referred to as the Commission) to determine deer harvest in Florida by Deer Management Unit in the 2014-2015 hunting seasons. The study is similar to ones conducted by Responsive Management in past years. The study entailed a telephone survey of Florida deer hunters. Specific aspects of the research methodology are discussed below.

USE OF TELEPHONES FOR THE SURVEY

For the survey, telephones were selected as the preferred sampling medium because of the almost universal ownership of telephones among Florida hunters (both landlines and cell phones were called). Additionally, telephone surveys, relative to mail or Internet surveys, allow for more scientific sampling and data collection, provide higher quality data, obtain higher response rates, are more timely, and are more cost-effective. Telephone surveys also have fewer negative effects on the environment than do mail surveys because of reduced use of paper and reduced energy consumption for delivering and returning the questionnaires.

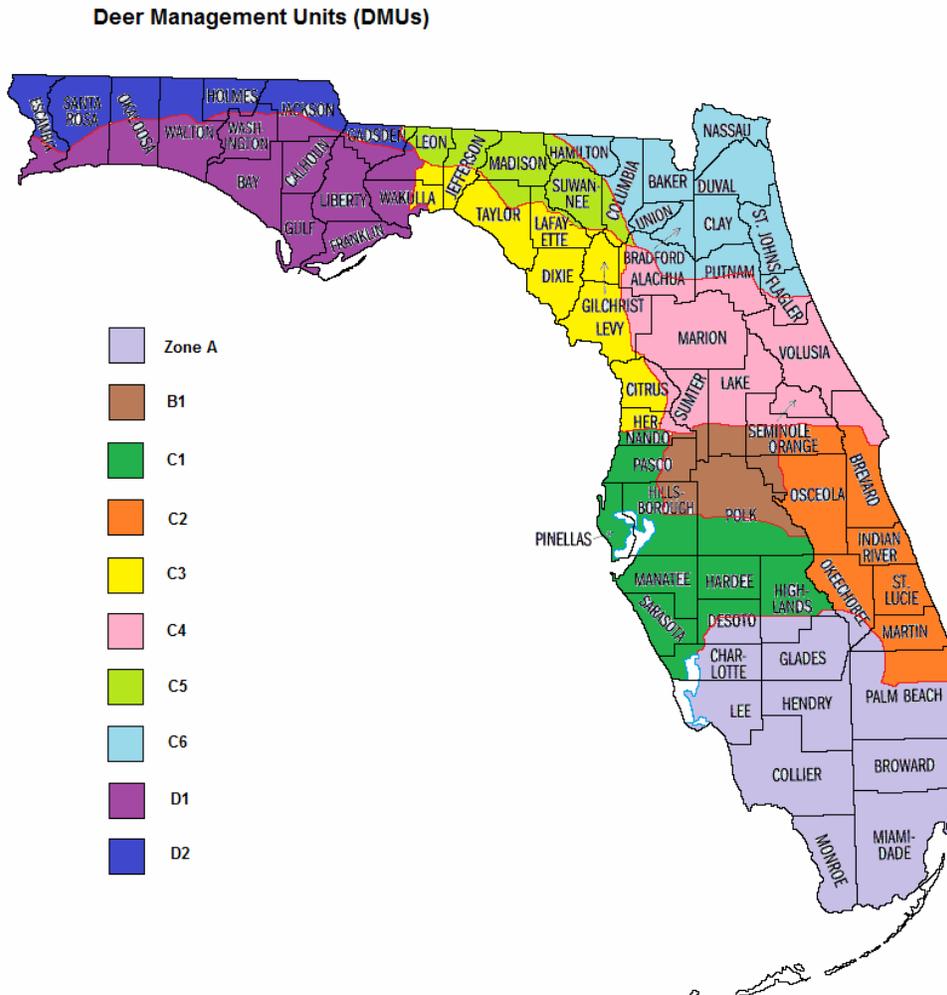

QUESTIONNAIRE DESIGN

Responsive Management and the Commission cooperatively developed the telephone survey questionnaire, based on past surveys as well as the research team's familiarity with hunting and harvest studies. Responsive Management conducted pre-tests of the questionnaire to ensure proper wording, flow, and logic in the survey. The survey instrument is presented in Appendix A.

The survey entailed determining the Deer Management Unit (DMU) in which respondents hunted and/or harvested deer (see map on the following page), even though the deer hunters themselves may have not been aware of the DMUs. To obtain data to allow this determination to be made, respondents were asked to name the county in which they hunted or harvested deer. For some counties that were completely contained in a single DMU, the determination of DMU was straightforward. For those counties that are in more than one DMU (i.e., a DMU boundary passes through the county), follow-up questions were asked to determine in which DMU the

respondent had hunted or harvested. For the purposes of this survey, DMUs A1, A2, and A3 were not differentiated and were analyzed together as Zone A.

Florida Deer Management Units

Map produced in color; will not be legible in black-and-white prints.

If the respondent did not know the physical feature used as the DMU boundary line, such as not knowing where a certain road was located (or if he/she did not know the county name at all), follow-up information asked for landmarks or the nearest town to allow the proper county and DMU to be assigned to those responses; these were assigned by the data analysts after the survey was completed.

The DMUs in the 2015 survey and analysis are *not* the same as in the previous surveys (2013 and 2014). For this reason, results at the DMU level are not exactly comparable between the two studies.

SURVEY SAMPLE

The sample of Florida deer hunters was obtained from the Commission, consisting of any license that allowed deer hunting. The sample included nonresidents. The sampling procedures required that the survey be administered in two phases. In the first phase, a random sample of all Florida deer hunters (i.e., not stratified at this point) was surveyed. This initial survey on the overall population of deer hunters, including nonresidents, provided a picture of where deer hunters as a whole went hunting. The proportions of deer hunters in the DMUs from this overall sample established the proportions hunting in the various DMUs and subsequently allowed weighting factors to be put on the data to allow statewide results. In the second phase of the survey, the sample was stratified to obtain completed interviews for those DMUs in which a low number of completed interviews had been obtained so that results within that DMU would be statistically valid.

The tabulation below shows the final count for number of deer hunters who hunted in each DMU and the number who harvested a deer in the 2014-2015 hunting seasons; these data were weighted to produce statewide results. Note that hunters can hunt and harvest in multiple DMUs.

DMU	Number in Sample Who:	
	Hunted	Harvested
Zone A	542	172
B1	541	145
C1	532	198
C2	609	187
C3	474	194
C4	641	202
C5	351	168
C6	440	175
D1	435	181
D2	317	169
Not sure which DMU	210	53

TELEPHONE INTERVIEWING FACILITIES

A central polling location in Harrisonburg, Virginia, allowed for rigorous quality control over the interviews and data collection. Responsive Management maintains its own in-house telephone interviewing facilities. These facilities are staffed by interviewers with experience conducting computer-assisted telephone interviews on the subjects of outdoor recreation and natural resources.

To ensure the integrity of the telephone survey data, Responsive Management has interviewers who have been trained according to the standards established by the Council of American Survey Research Organizations. Methods of instruction included lecture and role-playing. The Survey Center Managers and other professional staff conducted a project briefing with the interviewers prior to the administration of this survey. Interviewers were instructed on type of study, study goals and objectives, handling of survey questions, interview length, termination points and qualifiers for participation, interviewer instructions within the survey questionnaire, reading of the survey questions, skip patterns, and probing and clarifying techniques necessary for specific questions on the survey questionnaire.

INTERVIEWING DATES AND TIMES

Telephone surveying times are Monday through Friday from 9:00 a.m. to 9:00 p.m., Saturday from noon to 5:00 p.m., and Sunday from 5:00 p.m. to 9:00 p.m., local time. A five-callback design was used to maintain the representativeness of the sample, to avoid bias toward people easy to reach by telephone, and to provide an equal opportunity for all to participate. When a respondent could not be reached on the first call, subsequent calls were placed on different days of the week and at different times of the day. The survey was conducted in May 2015.

TELEPHONE SURVEY DATA COLLECTION AND QUALITY CONTROL

The software used for data collection was Questionnaire Programming Language (QPL). The survey data were entered into the computer as each interview was being conducted, eliminating manual data entry after the completion of the survey and the concomitant data entry errors that may occur with manual data entry. The survey questionnaire was programmed so that QPL

branched, coded, and substituted phrases in the survey based on previous responses to ensure the integrity and consistency of the data collection.

The Survey Center Managers and statisticians monitored the data collection, including monitoring of the actual telephone interviews without the interviewers' knowledge, to evaluate the performance of each interviewer and ensure the integrity of the data. The survey questionnaire itself contains error checkers and computation statements to ensure quality and consistent data. After the surveys were obtained by the interviewers, the Survey Center Managers and/or statisticians checked each completed survey to ensure clarity and completeness.

DATA ANALYSIS

The analysis of data was performed using Statistical Package for the Social Sciences as well as proprietary software developed by Responsive Management. In addition to analyses by DMU, the report includes some results by Deer Management Zones (A through D). Zone B consists of DMU B1; Zone C consists of DMUs C1 through C6; Zone D consists of DMUs D1 and D2. As mentioned previously, DMUs A1, A2, and A3 were not differentiated and were analyzed together as Zone A. Because DMU boundaries changed from the previous survey, the Zones also changed.

ESTIMATES BASED ON SURVEY DATA

SUMMARY OF TOTAL HARVEST, HARVEST BY SEASON, AND TOTAL HUNTER DAYS

Total Deer Hunters			
	Estimated Number of Deer Hunters		
	Estimate	Lower Bound (95% CI)	Upper Bound (95% CI)
Total Statewide	110,680	106,837	114,522

Total Harvest Estimate			
	Number of Deer Harvested		
	Estimate	Lower Bound (95% CI)	Upper Bound (95% CI)
Total Statewide	102,478	96,713	108,243

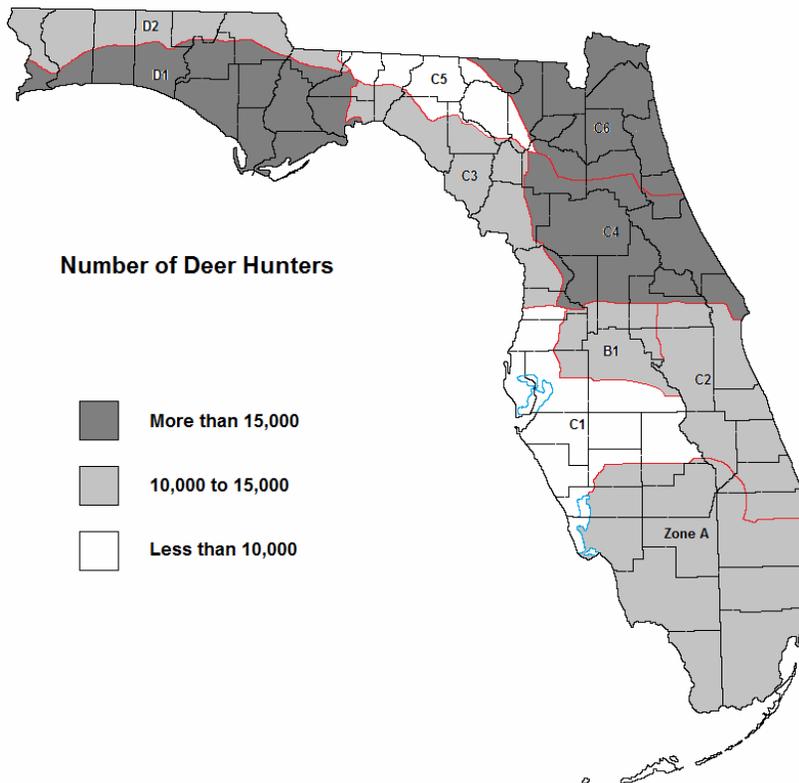

Total Harvest Estimates by Season				
Type of Deer	Season Harvested Deer	Number of Deer Harvested		
		Estimate	Lower Bound (95% CI)	Upper Bound (95% CI)
Bucks	Archery	10,904	9,946	11,863
	Crossbow	2,698	2,185	3,210
	Muzzleloader	6,902	6,111	7,693
	General Gun	43,429	42,234	44,624
	Not sure	290	119	461
	TOTAL	64,223	62,662	65,783
Does	Archery	12,910	11,978	13,842
	Crossbow	2,930	2,405	3,454
	Muzzleloader	905	605	1,205
	General Gun	21,227	20,247	22,207
	Not sure	283	114	452
	TOTAL	38,255	36,695	39,816
Total Statewide		102,478	96,713	108,243

Total Days Hunted Estimate									
	Estimated Number of Deer Hunters			Estimated Number of Days Hunted			Number of Deer Harvested Per Day Hunted		
	Estimate	Lower Bound (95% CI)	Upper Bound (95% CI)	Estimate	Lower Bound (95% CI)	Upper Bound (95% CI)	Estimate	Lower Bound (95% CI)	Upper Bound (95% CI)
Total Statewide	110,680	106,837	114,522	2,436,812	2,328,868	2,544,757	0.068	0.062	0.073

NUMBER OF DEER HUNTERS BY DMU AND BY COUNTY

- The first phase of the survey provided a statewide “snapshot” of where deer hunters were hunting for deer in Florida. It shows that DMUs C4, D1, and C6 each have more than 15,000 deer hunters.
 - Following the tabulation is a map showing deer hunters by DMU.

Total Deer Hunters by DMU			
DMU Hunted Whether Harvested Any Deer or Not	Estimated Number of Deer Hunters		
	Estimate	Lower Bound (95% CI)	Upper Bound (95% CI)
Zone A	10,030	9,043	11,016
DMU B1	10,530	9,520	11,539
DMU C1	9,332	8,379	10,284
DMU C2	12,603	11,504	13,702
DMU C3	14,943	13,753	16,133
DMU C4	16,842	15,585	18,100
DMU C5	7,963	7,080	8,847
DMU C6	15,165	13,967	16,363
DMU D1	16,026	14,797	17,256
DMU D2	14,066	12,909	15,223
Not sure which DMU	5,580	4,837	6,323
Total Statewide	110,680	106,837	114,522

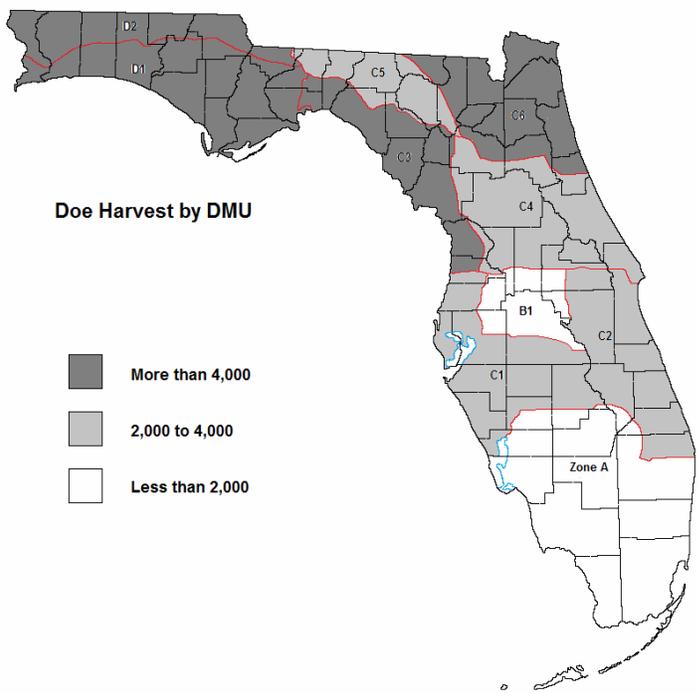

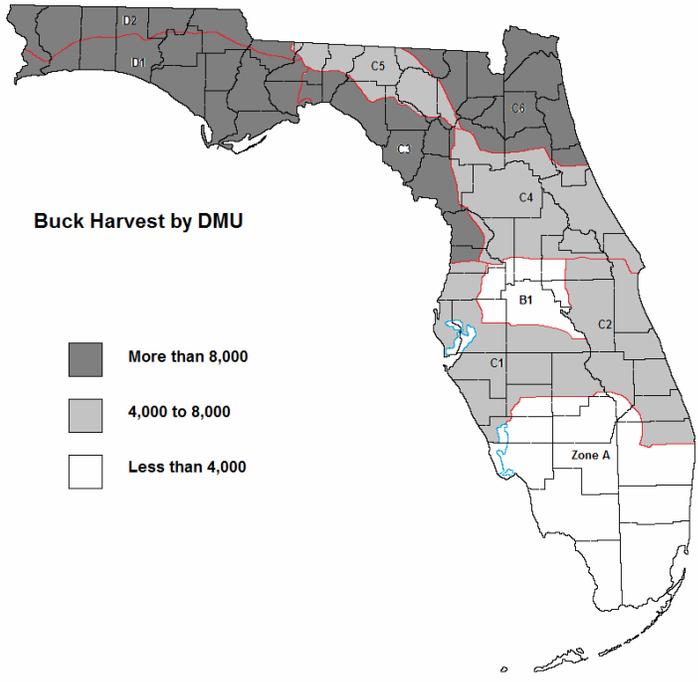

- Likewise, the first phase of the survey provided a county-by-county snapshot. Note that the margin of error is, necessarily, larger when examining data at the county level. The leading counties are Polk, Osceola, Lake, Okaloosa, and Marion—all with at least 4,000 hunters.
- A map is included after the tabulation on the following page.

Total Deer Hunters by County

Total	1,361	100
Bucks With at Least 4 Points Harvested by Florida Resident and Nonresident Licensed Hunters in 2014-2015		
		Percent
Deer hunters harvesting at least one buck		32.5
Deer hunters harvesting a buck with 4 point or more		29.7
Successful buck hunters harvesting at least one buck with 4 points or more		91.4
Percentage of total buck harvest consisting of bucks with 4 points or more		88.4

DEER HUNTER SATISFACTION

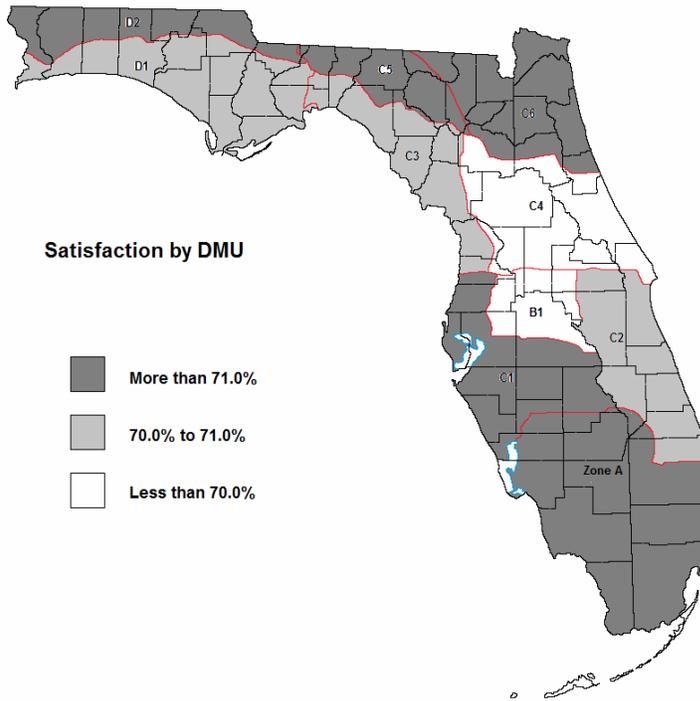

➤ Just more than two-thirds of Florida deer hunters are “very satisfied” or “satisfied” with deer hunting in Florida. Note that dissatisfaction is not simply the converse of satisfaction, as approximately 10% answer neutrally (this concept applies to all the tabulations in this section). The order of the tabulations is as follows:

- Statewide
- By management zone
- By DMU (with map)
- By land type
- By season

Percent of Hunter Satisfaction Statewide	
	All deer hunters
Very satisfied	21.9
Satisfied	49.3
Neither satisfied nor dissatisfied	9.4
Dissatisfied	14.5
Very dissatisfied	4.8
Don't know	0.2

PERCENTAGE OF DEER HUNTERS BY LAND TYPE

- Of those eligible for deer hunting with their license who hunted for deer, 90.5% hunted during the General Gun season, and 44.9% hunted during the Archery season. The sum exceeds 100% because some hunters hunted in multiple seasons.

Deer Hunting in 2014-2015 by Season and Land Type			
	Percent of Deer Hunters Who Hunted the Season	Percent of Deer Hunters Hunting on Private Lands Who Hunted the Season	Percent of Deer Hunters Hunting on Public Lands Who Hunted the Season
Archery Season	44.9	50.6	44.1
Crossbow Season	11.9	7.2	15.2
Muzzleloading Gun Season	32.6	36.0	33.2
General Gun Season	90.5	88.8	92.3

Note that hunters can hunt on both private and public land, as well as in multiple seasons.

DEER HUNTING TRENDS

- Trends are shown for 2008 through 2015 for percent of eligible hunters hunting for deer, by type of land hunted, and by overall satisfaction. For overall satisfaction, the trend of 2008 through 2015 is supplemented with three other data points for the years 2001, 2004, and 2005. Satisfaction by land type is from 2009 through 2015.

Trends in Deer Hunting By Season (Percent of All Hunters Who Hunted the Given Season) (by Date of Survey)								
	2008	2009	2010	2011	2012	2013	2014	2015

C:\DOCUME~1\ADMINI~1\RMN\DESKTOP\KIRKMA~1\FLORID~2\FLHARV15.TXT6/12/2015

Florida Statewide Deer Harvest Survey 2014-2015

1. FLHARV15

START

PRESS ENTER WHEN INTERVIEW BEGINS.

2. TIME WHEN PROGRAM WAS OPENED.

TIME1 1:1-5

3. SURVEY NAME

SNAME 1:6

(CHECK ONLY ONE ANSWER)

1. FLHARV15

4. Hello, my name is _____, may I please speak with _____?

I'm calling on behalf of the Florida Fish and Wildlife Conservation Commission to ask you a few questions about your hunting experiences in Florida. This should only take about 5 to 10 minutes of your time. Your answers will be kept confidential and will not be associated with your name. Do you have time to help us out?

(IF ASKED: We are not selling anything or asking for donations, and your answers are very important to the Commission and will help maintain hunting opportunities in Florida.)

CONPER1 1:7-8

(CHECK ONLY ONE ANSWER)

- 1. Correct person, good time to do survey (GO TO QUESTION 6)
- 2. Bad time/schedule recall (CB - do not save) (GO TO QUESTION 5)
- 3. AM, NA, BZ (do not save)
- 4. TM (GO TO QUESTION 354)
- 5. RF
- 6. NE (GO TO QUESTION 355)
- 7. DS
- 8. BG
- 9. DL
- 10. Bad Number (missing digit, begins with zero, etc.)

242. How many other counties (did you hunt in but not harvest a deer during the 2014-2015 season)? (ENTER ? FOR DON'T KNOW)

CTYHNT1 30:245-246

HIGHEST VALUE = 20

SKIP TO QUESTION 245

=====

243. Are there any other counties where you hunted deer but did not harvest one during the 2014-2015 season? This includes those same counties where you harvested a deer but hunted deer there on a different type of land or during a different deer season without harvesting a deer.

(IF ASKED: By type of land I mean public or private. For example, if you harvested a deer on public land but then hunted deer in the same county on private land without harvesting a deer.)

ABOUT RESPONSIVE MANAGEMENT

Responsive Management is an internationally recognized public opinion and attitude survey research firm specializing in natural resource and outdoor recreation issues. Our mission is to help natural resource and outdoor recreation agencies and organizations better understand and work with their constituents, customers, and the public.

Utilizing our in-house, full-service telephone, mail, and web-based survey center with 50 professional interviewers, we have conducted more than 1,000 telephone surveys, mail surveys, personal interviews, and focus groups, as well as numerous marketing and communication plans, needs assessments, and program evaluations.

Clients include the federal natural resource and land management agencies, most state fish and wildlife agencies, state departments of natural resources, environmental protection agencies, state park agencies, tourism boards, most of the major conservation and sportsmen's organizations, and numerous private businesses. Responsive Management also collects attitude and opinion data for many of the nation's top universities.

Specializing in research on public attitudes toward natural resource and outdoor recreation issues, Responsive Management has completed a wide range of projects during the past 23 years, including dozens of studies of hunters, anglers, wildlife viewers, boaters, park visitors, historic site visitors, hikers, birdwatchers, campers, and rock climbers. Responsive Management has conducted studies on endangered species; waterfowl and wetlands; and the reintroduction of large predators such as wolves, grizzly bears, and the Florida panther.

Responsive Management has assisted with research on numerous natural resource ballot initiatives and referenda and has helped agencies and organizations find alternative funding and increase their membership and donations. Additionally, Responsive Management has conducted major organizational and programmatic needs assessments to assist natural resource agencies and organizations in developing more effective programs based on a solid foundation of fact.

Responsive Management has conducted research on public attitudes toward natural resources and outdoor recreation in almost every state in the United States, as well as in Canada, Australia, the United Kingdom, France, Germany, and Japan. Responsive Management has also conducted focus groups and personal interviews with residents of the African countries of Algeria, Cameroon, Mauritius, Namibia, South Africa, Tanzania, Zambia, and Zimbabwe.

Responsive Management routinely conducts surveys in Spanish and has conducted surveys in Chinese, Korean, Japanese and Vietnamese and has completed numerous studies with specific target audiences, including Hispanics; African-Americans; Asians; women; children; senior citizens; urban, suburban and rural residents; large landowners; and farmers.

Responsive Management's research has been upheld in U.S. District Courts; used in peer-reviewed journals; and presented at major natural resource, fish and wildlife, and outdoor recreation conferences across the world. Company research has been featured in most of the nation's major media, including CNN, *The New York Times*, *The Wall Street Journal*, and on the front pages of *USA Today* and *The Washington Post*. Responsive Management's research has also been highlighted in *Newsweek* magazine.
