Visit MyFWC.com/Fishing for up-to-date information on fishing, boating and how to help ensure safe, sustainable fisheries for the future.

FLRules.org
For the latest rules, always visit FLRules.org. FWC rules are in chapter 68:

Fish and Wildlife Alert Reward Program
Report fishing, boating or hunting law violations by calling toll-free 1-888-404-FWCC (3922); on cell phones, dial *FWC or #FWC depending on service carrier; report violations online at MyFWC.com/WildlifeAlert or text: Tip@MyFWC.com.

Stop the Spread of Nonnative Species
It is illegal to introduce any nonnative fish or any other nonnative organism into the waters of the state. To find out more visit MyFWC.com/WildlifeHabitats.

The Florida Fish and Wildlife Conservation Commission does not allow discrimination on the basis of race, color, sex, religion, national origin, age or disability. If you believe you have been discriminated against in any program, activity or facility of this agency which receives Federal financial assistance, you should contact/write to:

Florida Fish and Wildlife Conservation Commission, Office of Human Resources, 620 South Meridian Street, Tallahassee, FL 32399-1600; Telephone 850-488-6411 or contact/write to: Civil Rights Accessibility Coordinator for Public Access, U.S. Fish and Wildlife Service, Wildlife and Sport Fish Restoration Program, 5275 Leesburg Pike, Falls Church, VA 22041; Telephone 703-358-2349 or 703-358-2131.

On the cover
Crappie angler Joe Livingston with a nice “speck.”

Buy your license online!
When you buy your license online, it’s fast, convenient and saves time and travel.
Download the FWC Fish-Hunt-FL app for your iPhone or Android for instant access.

You can obtain a license 24 hours a day at GoOutdoorsFlorida.com and begin fishing immediately!
Licenses are also available toll-free at 1-888-FISHFLORIDA (1-888-347-4356).
Handling fees apply to telephone and Internet sales.
By Chairman Rodney Barreto

Freshwater fishing in the Sunshine State continues to thrive during these unprecedented times. As we continue to navigate a new normal, we encourage Floridians to continue to enjoy all the opportunities the Fishing Capital of the World has to offer. You don’t need a boat to reel in a Big Catch and enjoy Florida’s spectacular natural resources. Try fishing from a pier, lakeshore or riverbank where you could hook some amazing fish. From largemouth bass to black crappie, Florida lakes and rivers are home to a huge variety of freshwater fish. Freshwater fishing in Florida boosts the economy with annual total expenditures of $5 billion and is ranked No. 1 in the country with 4 million anglers. Florida’s role as the top fishing destination for travelers is overwhelming with 2 million nonresident anglers visiting the state with the ripple effect of these dollars creating an $8.7 billion economic impact from Florida’s recreational fisheries that supports over 80,000 jobs.*

Interested in getting back into fishing or want to take advantage of the numerous freshwater fishing opportunities available to residents and visitors alike, including two separate license-free freshwater fishing weekends? Each year on the first consecutive Saturday and Sunday in April and the second consecutive Saturday and Sunday in June the FWC offers License-free Fishing Days. On these days, the freshwater fishing license requirement is waived for all recreational anglers, including residents and nonresidents. All bag limits, closed areas and size restrictions apply on these dates.

TrophyCatch is the FWC’s premier largemouth bass citizen science conservation program that rewards anglers who provide documentation of largemouth bass caught and released in Florida that weigh at least 8 pounds or heavier. Participating anglers win prizes, such as gift cards, and rods and reels, while one lucky winner each season wins a bass boat. The FWC is committed to encouraging anglers to participate in the conservation of Florida’s trophy bass fishery to ensure Florida remains a state full of fishing opportunities.

The FWC conserves freshwater resources through innovative management techniques to sustain healthy fish and wildlife populations, promote stakeholder trust, increase appreciation of Florida’s freshwater ecosystems, and continue to provide anglers with more access and opportunities to freshwater fishing. Enhancing access and opportunities to Florida anglers will ensure that the Sunshine State continues to be the Fishing Capital of the World. Whether you choose to fish from shore, wade, paddle or motor out on one of our peaceful lakes or rivers, get out there and enjoy an unforgettable freshwater fishing experience.

TrophyCatch

Celebrating 11,000 caught, documented and released bass including 100 Hall of Fame wins of bass weighing over 13 lbs.

Become a Citizen-Scientist!
It starts with fishing then a photo or video to document your 8+ lbs. catch on a scale, release it and share your catch details at www.TrophyCatch.com. This extremely valuable data influences FWC research projects such as genetic studies, the ecological health of Florida’s fresh waterbodies, and the proper way to handle a trophy-sized bass for minimal stress.

This data even assisted with the FWC’s recent freshwater black bass regulation change and it will continue to play a key role in management decisions for Florida’s fresh waterbodies. More details can be found at bit.ly/TrophyResearch.

TrophyCatch Goals:
■ Create Citizen-Scientists of our anglers who are focused on trophy bass to help FWC better enhance, conserve, and promote trophy bass fishing.
■ Encourage catch-and-release of the biggest, oldest, most valuable bass.
■ Promote Florida’s freshwater fishing by collaborating with anglers, fishing-related businesses and local communities.

Get the latest updates:
Want to know which lakes are hot or who has the biggest bass so far this season? Simply sign up for program only emails at TrophyCatch.com, and “Like” or “Follow” us on Facebook and YouTube/TrophyCatchFlorida for the latest catches and partner information.

Big Catch
Celebrates anglers who land memorable-sized catches of 33 different freshwater species! Flip to page 16 to find out more about our Big Catch program and how to become an Elite Angler.

State Record
There are important details to know if you catch a possible Florida state record. Call the nearest FWC Regional Office to report a record. Learn more at BigCatchFlorida.com/State-Record.aspx

How to submit your 8 lbs. or larger bass:
Take a photo or video that shows both the entire bass on the scale and its weight.

FREE Entry to WIN this boat!
Visit TrophyCatch.com to share your catch data or use the TrophyCatch app!
G3 is proud to introduce our new bay model for 2021 – the Bay 17.

This exciting new model features a large front deck with bow livewell and storage, a console with room for large electronics and gauges along with two high back fishing chairs. Always ready for the next adventure.

This free booklet is your guide to Florida’s freshwater fishing laws and regulations. The Florida Administrative Code is the final authority on fishing laws (www.FLrules.org). The publisher strives to ensure this information is accurate but assumes no liability for errors that may occur. In addition, rules can change between publications. Contact the Florida Fish and Wildlife Conservation Commission (FWC) if you have questions not adequately covered in this booklet. This publication is valid from July 1, 2021, to June 30, 2022.

Florida remains the “Fishing Capital of the World,” due to great resources and responsible management. We consider the quality of life that is associated with recreational activities and living in a healthy environment to be extremely important to Floridians and visitors and are also striving to make Florida the undisputed “Bass Fishing Capital of the World.”

The FWC uses the best scientific management possible to help fulfill its mission of “Managing fish and wildlife resources for their long-term well-being and the benefit of people.” To fund those efforts, the Legislature sets fishing license fees and exemptions, as well as penalties for violating fish and wildlife conservation laws. **State law guarantees money from the sale of fishing licenses goes to the FWC and cannot be diverted.**

In 1950, Congressmen Dingell and Johnson, at the request of anglers and the fishing industry, created the Federal Aid in Sport Fish Restoration (SFR) program, wherein fishing tackle was assessed an excise fee and the monies returned to the states for fish restoration projects. The “Wallop-Breaux” amendment in 1984 added import duties on sport fishing equipment, pleasure boats and yachts as well as taxes on motorboat fuels. The result is one of the most successful “user-pays, public-benefits” programs in the world, with taxes from the sale of outdoor recreation supplies enhancing and promoting the resource.

Fifteen percent of Florida’s SFR funds went to boating access — building and repairing ramps and courtesy docks. The remainder went to fresh and saltwater fisheries conservation projects such as habitat restoration, fish stocking, artificial reefs construction and youth fishing clinics.

The FWC encourages all anglers to buy a license (GoOutdoorsFlorida.com). Even if you are legally exempt, you can contribute to the future of our fisheries resources by buying a license and helping the FWC keep your federal tax dollars in Florida to support sportfish restoration.

Recreational fishing is an enjoyable, wholesome experience that reflects a happy and healthy lifestyle. Moreover, it is the number 1 gateway activity to get youth connected to nature in active outdoor recreation, which can reduce obesity, improve grades and, most of all, add enjoyment to their lives.

The FWC is working hard to ensure safe and sustainable recreational fishing for all of our citizens and guests and depends on your license fees to make sure there are fish for tomorrow.
Stranded on the Water? You’re not Alone.

Breakdowns can feel unnerving but with an Unlimited Towing Membership, there’s no need to worry. With 600+ boats and 300+ ports on the water, help is just a phone call away.

Fishing license requirements and fees

License, permit, and issuance fees and exemptions are established by the Legislature. In addition to the cost of licenses and permits specified in this section, license agents charge issuance fees for selling licenses and permits. For up-to-date license information, visit MyFWC.com/License. Anglers may use credit cards to purchase licenses and permits 24 hours a day at GoOutdoorsFlorida.com or by calling toll-free 888-FISH-FLORIDA (347-4356). This enables anglers to obtain and use licenses immediately. Handling fees will apply on all Internet and telephone sales. License sales are nonrefundable.

Licensing requirements follow the species of fish you are fishing for, regardless of where you are fishing. Please see the “Frequently answered questions” on page 27 for more information. For fishing license exemptions, please see page 12, but remember anyone can buy a license to contribute to conservation.

### Resident Freshwater Fishing Licenses
For purposes of fishing in Florida, a “resident” is defined as any person who has declared Florida as his or her only state of residence as evidenced by a valid Florida driver license or identification card with both a Florida address and a Florida residency verified by the Department of Highway Safety and Motor Vehicles (HSMV). If the person does not have a Florida driver license or identification card on record with HSMV, a Florida voter information card, declaration of domicile, homestead exemption, or Florida Military Orders (active-duty United States military personnel and their immediate family members also stationed here) may be used as proof of Florida residency at a license agent or Tax Collector location.

### Nonresident Freshwater Fishing Licenses

- **Freshwater Fishing** (valid 12 months from specified start date) $47.00
- **3-Day Freshwater Fishing** (valid 3 consecutive days from specified start date) $17.00
- **7-Day Freshwater Fishing** (valid 7 consecutive days from specified start date) $30.00

### Lifetime Licenses (For Florida Residents Only)
Lifetime licenses are available to Florida residents only. Funds generated from sales of these licenses are invested, creating an endowment to support long-term conservation of Florida’s fish and wildlife resources. Costs of lifetime licenses are less than what would be spent on annual licenses, permits and fees, and are valid in Florida even if you move out of state.

**LIFETIME SPORTSMAN’S LICENSE**
(includes Hunting, Freshwater Fishing and Saltwater Fishing licenses; Deer, Wildlife Management Area, Archery, Turkey, Muzzleloading Gun, Crossbow, Florida Waterfowl, Snook and Lobster permits)

Federal Aid in Sport Fish Restoration — A legacy of success

How often do you see people or businesses wanting to be taxed and happy about it?

In 1937, President Franklin D. Roosevelt signed the Federal Aid in Wildlife Restoration Act. This Act has been key to implementing the North American Model of Wildlife Conservation (see MyFWC.com). Between 1941 and 1950, sport-fishing businesses paid a federal excise tax that was deposited in the general treasury of the United States but did not directly benefit manufacturers or anglers. In 1950, sportsmen and businesses teamed with conservation-minded policy makers to redirect these existing federal excise taxes to the Restoration Program (aka: SFR, Dingell-Johnson or Wallop-Breaux).

The concept was to restore sportfish populations and improve public access, so more people can enjoy fishing and so fishing sales would increase. Sport Fish Restoration (SFR) came about as a result of anglers wanting to see more money directed toward restoring the nation’s recreational fisheries, and ensuring better fishing opportunities for themselves and future generations. It has been the best thing for anglers since fishing reels were invented.

Today, SFR uses a small excise tax on fishing reels and other fishing tackle, as well as a motor boat fuel tax, to fund sport fish restoration and boating access programs. These excise taxes are collected by the Department of Interior and each state reports annually on the number of unique license anglers. Along with land mass, the U.S. Fish and Wildlife Service then calculates each state’s eligible allotment and is responsible for coordinating on SFR funding to each state. It is working. There are now at least 77 percent more anglers than in 1950. Purchases of tax-related items by anglers have increased by nearly 200 percent in dollars (adjusted for the consumer-price index) since 1955.

Anglers and fishing businesses want to know the benefits they receive in return. To help answer this, Andrew Loftus Consulting and Southwick Associates analyzed data on excise taxes invested, fishing participation, and angler purchases of excise-tax related products for a 2011 report to the Association of Fish and Wildlife Agencies. The report found that excise-tax related return-on-investment ranged from 1,585 percent in 1970 to 2,643 percent in 1980.

In Florida, SFR provides millions of dollars to support boating access and freshwater and saltwater fisheries conservation. In freshwater fisheries, the FWC uses this money to improve fisheries habitat, stock fish, conduct research and manage fish populations. We also conduct aquatic education programs and provide valuable fishing and conservation tips to anglers.
FRESHWATER FISHING TIPS

Fishing Basics and

Topwater Fishing in Florida

Shawn Elder, TrophyCatch participant

Florida is a great place to catch lots of trophy fish with topwater baits. If you want to try getting some topwater action, I recommend using a medium heavy or heavy action rod with 30-50 pound test braid. Any topwater lure that makes noise such as the Gambler Big EZ, Whopper Plopper, frogs, etc. works the best on lily pads or along grass lines. Trophy fish are smart and will try to get you caught on these pads and in the grass so you should always use braided line to pull these fish out. Try looking for water that is about 3-6 feet deep and reel as slowly as possible while still having your lure make noise and action. If you see a specific spot you want to cast on, try casting as far as possible past the spot before retrieving your lure. Early mornings, during sunset and days when the lake is very calm will always be the best time to fish topwater. You should also try to avoid having multiple lures close to each other at the same time and try to stay as quiet as possible, having your lure make almost all of the noise.

Berkley PowerBait Fools Pressured Fish

By Keith Carson, 2021 Bassmaster Classic Qualifier

Florida has a lot of bass, but it also has a lot of grass and a lot of fishing pressure, especially on some of the better-known lakes in my part of the state.

My confidence in the Berkley PowerBait Max-Scent baits skyrocketed as I learned how to use it to catch pressured fish. The secret to the bait’s effectiveness stems from the development of a soft bait that dispenses more scent than other soft baits on the market while preserving action and presenting a taste and texture that bass won’t let go.

My go-to technique for catching pressured fish is something I like to call “finesse punching.” To do this, I rig a 6-inch Berkley PowerBait Max-Scent The General on a 5/0 round-bend hook. Using a 1/2-ounce tungsten sinker on 40-pound-test braid, I look for main-lake grass points that should hold fish given whatever current there is at the time.

Flipping the bait into the hydrilla or grass, the shape of The General and the slimmer profile of the tungsten weight causing less disturbance to the water. With little to no splash to spook the fish in the grass, the bait’s slow, controlled fall allows a scent field to develop. As it passes by the ambush-ready bass holding in the grass, it looks and smells like real food. When bass bite Max-Scent baits, they are presented with a texture that’s very natural in terms of texture and taste, meaning they hang on longer to allow more time for hook sets. During tournament practices, I’ve even been able to get bass to the boat without a hook in the fish.

When it comes to fooling big, pressured Florida bass, don’t be afraid to put the power of science and research on your side.

Florida is also heavily fished by locals and tourists, so you should try looking locally on Google Maps for bodies of water that look hidden or not fished very often. Try looking for lakes or ponds that have very few docks or boats along the shore and lots of vegetation. Big fish can also be caught where you wouldn’t be able to bring most jon boats and especially bass boats. I personally use a kayak but you can also use smaller jon boats, Gheenoes and canoes to get through swamps or very shallow water for that trophy bass!
Tips from the Pros

Florida’s Speckled Perch

Gary Simpson, Gary’s Tackle Box, Gainesville

Across the south, no freshwater fish has a bigger army of angling fans than the crappie. Here in Florida, the generations-old term for the much-sought favorite is ‘speckled perch’. The ‘speck’ spends most of its life out in the deeper, open water of our lakes, feeding mostly on minnows. When autumn arrives, the specks’ feeding ramps up, and the best speck catches will be made through the colder months. During fall and winter, anglers typically drift open water with crappie jigs or live minnows set deep beneath floats. The most eagerly-anticipated event for the speckled perch lover is the comparatively brief spell when the fish move into weedy or brushy shoreline cover to spawn. Timing is critical, but this is the best period of time to catch the heaviest-bodied ‘slabs’ of the year. Here in the north part of the state, it’s a pretty good bet that the days around the full moon of February will see the strongest spawning activity. But, depending on the weather, the spawning peak can arrive in January or March. A couple of decades ago, a 3-pound 12-ounce speck hung on the wall at McGilvray’s Fish Camp on Newnan’s Lake. Caught in 1964 by Johnny McGilvray, this fish was for some years the Florida record. The old fish camp is long gone, and the Florida record speckled perch, listed properly in the record books as ‘Black Crappie’, is now an ounce heavier. I often think of that impressive mount that looked out over the minnow tanks, drink coolers, and the racks of lures, hooks, and weights. The giant slab gave hope to all of us who were about to head out onto the lake to try our luck. I have no idea where it ended up, but I hope that, somewhere, the mounted fish is still intact as a remnant of North Florida’s fishing history.

Learn about the Black Crappie Management Plan on page 18

Black crappie is a highly valued game fish throughout much of North America, including Florida, where the species is commonly known as “speckled perch” or “specks.” To best direct management and research for this popular species, Florida Fish and Wildlife Conservation Commission staff have drafted a comprehensive Black Crappie Management Plan, which utilizes a thorough review of existing scientific literature and extensive communications with crappie anglers.
Methods of taking freshwater fish
Game fish may only be taken with pole-and-line or rod-and-reel. There is no limit on the number of rods an angler may use.

Freshwater fish may not be taken by use of any free-floating, unattached device, or by taking of fish or wildlife with firearms, explosives, electricity, spear gun, poison or other chemicals. The taking of fish by underwater swimming or diving is prohibited. It is unlawful to sell, offer for sale or transport out of the state any freshwater game fish unless specifically permitted by the FWC, except that licensed anglers may transport two days’ bag limit of legally harvested game fish.

It is illegal to possess any freshwater fish along with gear that cannot legally be used to take freshwater fish, including gear types listed above and below for taking nongame fish or bait. An exception is game fish may be possessed together with cast nets having a stretched mesh size not greater than 1 inch; minnow dip nets not more than 4 feet in diameter; minnow seines having a stretched mesh size not greater than 1 inch, a length not more than 20 feet and a depth not more than 4 feet; and minnow traps not more than 24 inches in length and 12 inches in diameter, with a funnel entrance not more than 1 inch in spread.

“NOTE: Statutory provisions (790.052(3), F.S.) made it lawful for persons to own, possess, and lawfully use firearms and other weapons, ammunition, and supplies for lawful purposes including fishing, camping, or lawful hunting or going to or returning from a fishing, camping, or lawful hunting expedition. Consequently, although firearms may not be used to take fish, they can be in possession of someone with legally taken fish.

Nongame fish may be taken:
- With pole-and-line, or rod-and-reel, and by bush hook, setline or trotline baited with cut bait or other substance; but not including live game fish or any part of any game fish; bush hooks, setlines and trotlines (limited to 25 hooks total) are permitted for taking nongame fish for personal use, but only in those areas where trotlines may be lawfully used in accordance with the Wildlife Code of the State of Florida. Refer to the “Commercial Freshwater Fisheries Rules and Regulations Summary.”
- At night by bow and arrow, and gigs.
- During daylight hours by manually operated spears, gigs, snatch hooks, crossbow or bow and arrow from a boat: or from shore except at the spillways of the Eureka and Rodman dams on the Oklawaha River or on the spillway of the Jim Woodruff Dam on the Apalachicola River or in Miami-Dade County canals south of the C-4 and east of the L-31N and L-31W canals inclusively.
- By the use of cast nets in the South and Northeast regions, in Citrus County, and in the Southwest Region, except that possession or use of cast nets in waters adjoining Saddle Creek Fish Management Area, Polk County, confined by Morgan Combee Road, U.S. Highway 92 and Fish Hatchery Road are prohibited.
- Using a bow and light at night. Night bow-fishing tournaments do not require a permit in the Northwest Region.
- By netting and impounding at night from Sept. 1 to May 1 in specified waters of Northwest Florida. Nets used to take nongame fish (typically suckers) in these specified waters must be less than 100 feet in length, have a minimum 3-inch stretched mesh and shall be continuously attended to ensure immediate release of any trapped game fish. Contact the Northwest Regional office for details (page 6).
- For personal use by any person possessing a valid freshwater fishing license by the use of not more than one slat basket or one wire trap, made as specified in Rule 68A-23.003, FAC, and used only in those waters where use of wire traps or slat baskets is permitted for commercial purposes. Refer to the “Commercial Freshwater Fisheries Rules and Regulation Summary.” Passive fishing gear such as slat baskets or wire baskets must be clearly and legibly marked with the harvester’s name and address while being used or possessed in or upon waters of the state.

Prohibited gear for taking marine species in freshwater
- Spearfishing: Use of any hand or mechanically propelled, single or multi-pronged spear or lance, barbed or barbless, to harvest
or attempt to harvest any marine species while diving in freshwater is prohibited.
- Spearfishing for mullet in fresh water is prohibited; however, gigging from above water is permitted.

**Methods of taking bait**
Freshwater shrimp and golden shiners of any size, or other freshwater nongame fish, including catfish, less than 8-inches total length may be taken for bait by the following methods, unless specifically prohibited:
- Cast nets having a stretched mesh size not greater than 1 inch in fresh waters of the state, unless specifically prohibited.
- Minnow dip nets not more than 4 feet in diameter.
- Minnow seines having a stretched mesh size not greater than 1 inch, a length not more than 20 feet, and a depth not more than 4 feet.
- Minnow traps not more than 24 inches in length and 12 inches in diameter, with a funnel entrance not more than 1 inch in spread.
- Any game fish taken by these methods must be released immediately.
- Taking of bait for the purpose of sale requires a commercial fishing license.

**Taking and possession of freshwater mussels**

Certain families of freshwater mussels may be collected for personal use. The bag limit for freshwater mussels from these families is 10 per person (or 20 half shells). The possession limit is two days bag limit (see images to right and FAQ, page 27).

Mussels shall be taken by hand-picking only. Use of brailles, crowfoot bars, or other mechanical methods is prohibited. Freshwater mussels, live or dead, may not be taken for later sale.

**Other clams**
Species of freshwater mussels from other families, such as the Asian clam, have no bag or possession limits.

**Protected Sturgeons**
The species of sturgeon found in Florida—Atlantic (Acipenser oxyrinchus), Gulf (A. o. desotoi), and shortnose sturgeons (Acipenser brevirostrum)—are protected both federally and in the state of Florida. No person shall take, possess or sell any sturgeon or parts thereof, or their nests or eggs, except as allowed by specific federal or state permit or authorization. People who inadvertently catch one must immediately release it alive back to the water.

**Win a $100 Gift Card!**
Take the monthly

**Use of fish for bait**
- Black bass, peacock bass or any part thereof may not be used as bait.
- No live nonnative fish, except variable playts and fathead minnows, may be transported to or between waters for use as bait. Live goldfish and carp may not be used as bait.
- Whole pickerel or panfish (e.g., bluegill, redbreast sunfish, spotted sunfish, flier, warmouth) or parts thereof may be used as bait for sportfishing by the angler who caught them. Whole pickerel or bream or parts thereof may not be used as bait for trotlines or bush hooks or any method other than by rod and reel or pole and line.
- Panfish less than 4 inches in total length raised by a licensed aquaculture facility may be purchased and used for bait.

**Restricted species**
Live specimens of Conditional (68-5.004(1), F.A.C.) and Prohibited (68-5.006(1), F.A.C.) nonnative species may not be possessed. Northern black bass (Micropterus salmoides) are on the conditional nonnative species list. Stocking northern black bass is prohibited. Pure Florida bass (Micropterus salmoides floridanus) may only be purchased from permitted hatcheries with pure Florida bass stocks authenticated by the FWC. For more information, contact the nearest regional office (page 6). See Chapter 68-5, F.A.C. at www.FLrules.org for details.

**It is illegal to possess alligator gar without a permit.**

It is illegal to possess alligator gar without a Scientific Collectors Permit. Alligator gar are an endemic top predator found only in the panhandle rivers and grow to more than 120 pounds. Due to limited numbers, harvest is restricted. Their gator-like snout is distinctly different than spotted and longnose gar, the two other species of gar found in the panhandle.
Statewide bag and length limits

Special bag and length limits apply to some lakes, rivers (this page) and Fish Management Areas (pages 21–26). Other fishes considered to be nongame fishes have no bag or possession limits, except as noted in individual Fish Management Area regulations.

No person shall take in any one day more than the following bag limits of freshwater game fish:

- 5 Black bass (including largemouth, Suwannee, spotted, Choctaw and shool bass, individually or in total), only one of which may be 16 inches or longer in total length. There is no minimum length limit for largemouth bass.
- No person shall kill or possess any Suwannee, shoal, spotted, or Choctaw bass on the Chipola River or its tributaries. Any shoal bass that are caught must be released immediately.
- 50 Panfish including bluegill, redear sunfish (shellcracker), flier, longear sunfish, mud sunfish, shadow bass, spotted sunfish (stumpknocker), warmouth and redbreast sunfish, individually or in total.
- 25 Crappie (speckled perch).
- 20 Striped bass, white bass, and sunshine bass (individually or in total), of which only 6 may be 24 inches or longer in total length.
  » In the Suwannee River, areas north and west of the Suwannee River, and in any tributary, creek or stream of the Suwannee River: the bag limit for striped bass is 3, each of which must be at least 18 inches in total length (20 fish combined bag limit) (See map page 20).
- 2 Butterfly peacock bass, only one of which may be 17 inches or longer in total length.
- 25 American eels, must be nine inches or greater in total length. The recreational bag limit for American eels is 25 per angler per day. Wholesale/Retail purchase exemption. Recreational anglers purchasing American eel as bait may possess more than the legal bag limit provided that the eels were purchased from a licensed dealer.

Notes:
- No person shall have in his possession more than two days’ bag limit of freshwater game fish (see Rule 68A-23.005 for details).
- Each angler is responsible for his or her own bag limit. It is illegal to transport or possess more than two days’ bag limit of fish per licensed angler without a commercial license. Exceptions are fish legally acquired from aquaculturists (fish farmers) for use in aquaria, for brood stock, pond stocking, or properly marked for the market.

Special bag and length limits

See Fish Management Area regulations for bag and length limits for lakes in the Fish Management Area system (Pages 21–26).

Jim Woodruff Reservoir, Lake Seminole. In the waters of and on the banks of the waters of Lake Seminole — bounded on the west by Florida State Road No. 271, on the south by the Jim Woodruff Dam, on the east by a line immediately east of the Chattahoochee Marina, also known as the Booster Club, running northwest across the lake to the tip of land at the junction of the Flint and Chattahoochee Rivers,
west of Spring Creek; and on the north by the Herman Talmadge Bridge across the Chattahoochee River: 10 black bass, each must be 12 inches or greater in total length; 15 striped bass, white bass and sunshine bass (individually or in total), of which no more than two may be 22 inches or longer in total length; 30 crappie (speckled perch); 50 panfish (does not include crappie); 15 pickerel (chain, grass and redfin). Possession limit is 50 fish total, regardless of species.

- St. Marys River and its tributaries: 10 black bass, each must be 12 inches or greater in total length; two striped bass, sunshine bass or white bass, both of which must be at least 22 inches in total length; 30 crappie (speckled perch); 50 panfish (does not include crappie); 15 pickerel (chain, grass and redfin).

- Lake Talquin, Leon and Gadsden counties (including that portion of the Ocklawhaha River lying between Lake Talquin and the railroad trestle that is located immediately below U.S. Highway 90, that portion of the Little River lying between Lake Talquin and County Road 268, that portion of the Rocky Comfort Creek lying between Lake Talquin and County Road 65-B, and that portion of Bear Creek lying between Lake Talquin and State Road 267, those portions of Blount’s, Freeman [Stoutamire], and Harvey and Polk creeks lying between Lake Talquin and State Road 20): Crappie less than 10 inches in total length must be released immediately.

- Silver Glen Springs in Lake and Marion counties and Salt Springs in Marion County: Fishing is prohibited in and within 50 yards of the springs.

- Rainbow Springs, Marion County: Fishing is prohibited from the headwaters of Rainbow Springs to a point one mile downstream on Rainbow River within Marion County.

- Wildcat Lake, Marion County (Ocala National Forest): Black bass must be released immediately.

- St. Johns River Water Management Area (Farm 13, including the Stick Marsh), Indian River and Brevard counties: Black bass must be released immediately.

- S.N. Knight Tract, Indian River County (locally known as Kenansville Lake): Black bass must be released immediately.

- Lake Okeechobee: Crappie (speckled perch) less than 10 inches in total length must be released immediately. Lake Okeechobee, for purposes of these rules, is defined as any point lakeward of a boundary line delineated by the following points:
  » Intersection of St. Rd. 78 and U.S. 441
  » U.S. 441 SE to St. Rd. 5 (“80”) (41.5 miles)
  » St. Rd. 5 (“80”) to St. Rd. 25 (U.S. 27) (41.5 miles)
  » St. Rd. 25 (U.S. 27) to St. Rd. 78 (41.5 miles)
  » St. Rd. 78 to U.S. 441 (41.5 miles)

- Perdido River: 10 black bass; 15 striped bass, white bass and sunshine bass (only 5 of which may be 22 inches or longer in total length); 30 crappie (speckled perch, all of which must by 9 inches or longer); 50 panfish (does not include crappie, possession limit is 50 fish total, regardless of species).

- Lake Jackson (Walton County): 5 black bass (all of which must be 12 inches or greater in total length, only one of which may be longer than 22 inches in total length); 15 striped bass, white bass and sunshine bass (only 5 of which may be 22 inches or longer in total length); 30 crappie (speckled perch); 50 panfish (does not include crappie, possession limit is 50 fish total, regardless of species).
Florida freshwater fishes are divided into game fish that have specific bag and length limits and may only be taken with pole-and-line or rod-and-reel, and nongame fish, which are all others. A license is required to take nongame fish, but additional gear types are allowed (see Page 12). Nonnative fish are those that do not occur in Florida naturally; most should be harvested and never released. Exceptions are peacock bass, which is a game fish, and triploid grass carp, which are stocked for vegetation control (see Page 13). Where applicable, state record (SR) weights and the Big Catch (BC) qualifying length or weight for adults are provided. See Page 4 or BigCatchFlorida.com for more details including youth qualifying sizes, slams, specialist, master, elite angler and the TrophyCatch citizen-science rewards program.

For details on state records and angler recognition programs visit: BigCatchFlorida.com

### BLACK BASS
- **Largemouth bass:** SR 17.27 lbs; BC 24'/8.0 lbs
- **Spotted/Choctaw bass:** SR 3.75 lbs; BC 16'/2.0 lbs
- **Shoal bass:** SR 5.95 lbs; BC 16'/2.0 lbs
- **Suwannee Bass:** SR 3.89 lbs; BC 14'/1.5 lbs

### PANFISH
- **Black crappie:** SR 3.83 lbs; BC 14'/2.0 lbs
- **Bluegill:** SR 2.95 lbs; BC 10'/1.0 lb
- **Redear sunfish:** SR 4.86 lbs; BC 11'/1.25 lbs
- **Flier:** SR 1.35 lbs; BC 8'/0.5 lb
- **Warmouth:** SR 2.44 lbs; BC 9'/0.5 lb
- **Spotted sunfish:** SR 0.83 lbs; BC 7'/0.5 lb

### TEMPERATE BASS
- **Striped bass:** SR 42.24 lbs; BC 30'/12.0 lbs
- **White bass:** SR 4.69 lbs; BC 15'/2.5 lbs
- **Sunshine bass:** SR 16.31 lbs; BC 20'/5.0 lbs

### CICHLID
- **Butterfly peacock bass:** SR 9.08 lbs; BC 18'/4.0 lbs

### CATFISH
- **Channel catfish:** SR 44.50 lbs; BC 25'/12.0 lbs
- **White catfish:** SR 18.88 lbs; BC 22'/5.0 lbs
- **Yellow bullhead:** SR 5.05 lbs; BC 14'/1.5 lbs
- **Brown bullhead:** SR 7.02 lbs; BC 16'/2.0 lbs

### NONGAME FISH
- **American shad:** SR 5.19 lbs; BC 18'/3.0 lbs
- **Bowfin:** SR 19.00 lbs; BC 28'/8.0 lbs
- **Chain pickerel:** SR 6.96 lbs; BC 22'/3.0 lbs
- **Florida/Spotted gar:** SR 9.44 lbs; BC 28'/4.0 lbs
- **Bowfin:** SR 19.00 lbs; BC 28'/8.0 lbs
- **Chain pickerel:** SR 6.96 lbs; BC 22'/3.0 lbs
- **Florida/Spotted gar:** SR 9.44 lbs; BC 28'/4.0 lbs
- **Bowfin:** SR 19.00 lbs; BC 28'/8.0 lbs
- **Chain pickerel:** SR 6.96 lbs; BC 22'/3.0 lbs
- **Florida/Spotted gar:** SR 9.44 lbs; BC 28'/4.0 lbs

Black Crappie Management

Linking Stakeholder Input and Scientific Data

The black crappie is a highly valued game fish throughout much of North America, including Florida, where the species is locally known as speckled perch or specks. Florida’s black crappie fisheries are seasonal, with high catch rates occurring during winter and spring, making Florida a popular winter destination for traveling anglers. Florida’s crappie fisheries are important to resident and non-resident anglers alike, making black crappie the most targeted fish during winter at some lakes and in some cases the most targeted fish for the entire year.

Black crappie length limits vary across the state to reflect the differences in their populations from region to region as well as management objectives. Florida’s warmer climate leads to a long growing season and crappie in the Sunshine State have varied food sources as they mature, as well as differences in spawning seasons as you move north to south in the state. With these differences in mind, waterbodies can be managed to accomplish different goals. For example, the regulation on one waterbody could be tailored to produce trophy size black crappie and a different regulation on another lake can be implemented to increase the total yield anglers harvest by balancing the size of the fish and total numbers caught.

When a length limit is proposed, biologists collect data on growth rates, natural and harvest mortality, angler effort, and total harvest. Biologists then utilize models to estimate how the fishery might change under different regulations. Once a regulation takes effect, biologists continue to monitor the population and conduct creel surveys to gauge angler satisfaction and record the number and size of fish that are being harvested. This data is collected in cooperation with local anglers and FWC biologists could not complete this evaluation without angler collaboration.

When an angler releases a fish in accordance with current regulations, several things happen. Research conducted by FWC has shown a very low hooking mortality of black crappie, meaning most fish released will survive and able to be caught again. Additionally, studies in several states have revealed length limits may be a factor in producing bigger fish or higher total yield by weight if fish growth is fast, natural mortality is low, and fishing pressure is high.

To best direct management and research for this popular species, FWC staff has drafted a comprehensive Black Crappie Management Plan, which utilizes a thorough review of existing scientific literature and extensive communications with crappie anglers. As one of the main objectives in the plan, freshwater fisheries biologists are currently reviewing crappie regulations. They have conducted 11 virtual meetings as well as a statewide survey to gather stakeholder input. The FWC will be taking the data collected from those meetings, mail out surveys and angler creel surveys and evaluating them along with biological data. This is the first review of statewide crappie regulations in Florida and the FWC staff will determine which regulations are effective for given waterbodies given stakeholder opinions and biological data. FWC staff will then provide regulation recommendations to our Commission, with the goal of ensuring the long term quality of Florida’s black crappie fishery.
Top Spots to Fish for Popular Freshwater Species:

The locations below are expected to be the best Florida fishing locales for 2021-2022. For up-to-date Quarterly Fishing Forecasts also check www.MyFWC.com/Fishing/Freshwater/Sites-forecasts/.

Regulations for Fish Management Areas

1. A fishing license is required for residents from 16 to 64 years of age, and for nonresidents 16 or more years of age, to fish by any method, including cane poles, on a Fish Management Area. Refer to Fishing License Fees for exemptions (Pages 8 and 12).

2. The possession of fishing tackle is prohibited on any Fish Management Area that is closed to fishing.

3. Bag limits and methods of taking freshwater fish apply except as provided for a particular Fish Management Area.

4. The possession of nets (other than legal minnow seines, cast nets or dip nets), fish traps, trotlines or setlines is prohibited unless specifically authorized by rules established for a particular Fish Management Area.

5. Persons entering or leaving Fish Management Areas that have designated entry points shall enter or leave only at such designated points.

6. Any vehicle, boat or other transportation device may be searched while in, entering or leaving a Fish Management Area.

7. Fish Management Areas may be temporarily closed to accommodate management projects (e.g., drawdowns), or if unsafe conditions exist, or as otherwise specified in a specific Fish Management Area rule.

8. Intentional release of wildlife or freshwater fish on Fish Management Areas is prohibited.

Northwest Region
(see map on Page 6 for regions)

Lake Stone, Escambia County: open to fishing.
- Gasoline motors may not be used on boats.
- Channel catfish bag limit: ................. 6
- No motor vehicles on dams, spillways and fishing fingers.

Joe Budd Pond, Gadsden County: Closed to fishing, except as authorized by permit for Commission-sanctioned events (see MyFWC.com/Fishing for details). Open to fishing during daylight hours on Saturdays and Sundays during July, August and September or as specified by order of the Executive Director.
- No motor vehicles on dams, spillways and fishing fingers.
- Gasoline motors may not be used on boats.
- Channel catfish bag limit: ................. 6
- Sunshine bass bag limit: ................. 10
- Black bass bag limit: ....................... 1
- Black bass less than 16 inches in total length must be released immediately.

Lake Victor, Holmes County: open to fishing.
- Gasoline motors may not be used on boats.
- Channel catfish bag limit: ................. 6
- No motor vehicles on dams, spillways and fishing fingers.

Merritt’s Mill Pond, Jackson County: open to fishing.
- The taking of fish and wildlife with rifles is prohibited.
- Gigs are prohibited.
- Trotlines may be used.
- Redear sunfish (shellcracker) bag limit: . . . 10
- Redear sunfish less than 10 inches in total length must be released immediately.
- No bag limit for channel catfish.

Lake Piney Z, Leon County: open to fishing.
- Panfish bag limit: ......................... 20
- Channel catfish bag limit: ................. 6
- Swimming, and taking of fish or wildlife with firearms or possession of alcoholic beverages are prohibited.
- Watercraft shall be allowed only as authorized by the City of Tallahassee.
- Access is prohibited from sunset until sunrise.
- Use or possession of cast nets or minnow seines is prohibited.
- No motor vehicles on dams, spillways and fishing fingers.

Hurricane Lake, Okaloosa County: open to fishing.
- Gasoline motors may not be used on boats.
- Channel catfish bag limit: ................. 6
- No motor vehicles on dams, spillways and fishing fingers.

(Continued on Page 22)
Karick Lake, Okaloosa County: Renovations are ongoing at Karick Lake. Contact the Northwest Regional Office for current status.  
- Gasoline motors may not be used on boats.  
- Channel catfish bag limit: .......................... 6  
- No motor vehicles on dams, spillways and fishing fingers.

Bear Lake, Santa Rosa County: open to fishing.  
- Gasoline motors may not be used on boats.  
- Channel catfish bag limit: .......................... 6  
- No motor vehicles on dams, spillways and fishing fingers.

Juniper Bay Lake, Walton County: open to fishing.  
- Channel catfish bag limit: .......................... 6  

**North Central Region**  
(see map on Page 6 for regions)

Lakes Lochloosa, Orange and Newnans, Alachua County: open to fishing.  
- Trotlines having a gallon-sized plastic float at each end may be used, provided that such lines are sunk to the bottom or to a minimum depth of 4 feet.  
- No bag limit for channel catfish.

Camp Blanding area, Clay County: Open to fishing. Magnolia and Lowry Lakes will be open to fishing on days and times determined by Camp Blanding Post Commander. Openings may be changed at discretion of Post Commander to accommodate military training. All anglers will be required to check into and out of area at a manned check station.  
- Guns are prohibited for taking of fish or wildlife except during designated hunting seasons for Camp Blanding Wildlife Management Area.  
- Boat launching permitted only at designated areas.  
- Camping is prohibited.  
- During periods closed to hunting, vehicles may be operated only on roads to designated access areas.  
- Use of all-terrain vehicles is prohibited.

Lake Dias, Volusia County: open to fishing.  ■ Nongame fish may be taken by castnets, dip nets, seines, trotlines, set lines, bush hooks, and traps as specified in Rules 68A-23.002, 68A-23.003 and 68A-23.004, F.A.C.

Southwest Region
(see map on Page 6 for regions)

Marl Pits 1 and 3, Charlotte County: open to fishing.  ■ Panfish bag limit: .......................... 20  ■ Bluegill and redear sunfish less than 8 inches in total length must be released immediately.  ■ Channel catfish bag limit: .................... 6

Marl Pit 2, Charlotte County: open to fishing.  ■ Bluegill and redear sunfish less than 10 inches must be released immediately.  ■ Bluegill and redear sunfish combined bag limit: .......................... 10  ■ Channel catfish bag limit: .................... 6

Webb Lake, Charlotte County: open to fishing during posted hours.  ■ Gasoline motors may not be used on boats.  ■ Panfish bag limit: .......................... 20  ■ Channel catfish bag limit: .................... 6  ■ Bluegill and redear sunfish less than 8 inches in total length must be released immediately.

Vehicles may be used only on designated roads.

Hardee County Park, Hardee County: open to fishing.  ■ All anglers shall enter at the Park main entrance, the designated entry point, unless otherwise instructed.  ■ Angling from a boat is allowed by entry pass issued by Hardee County.  ■ Angling from shore does not require an entry pass unless otherwise posted at the Park main entrance.  ■ Days and hours of operation and quotas for freshwater fishing are posted at the Park main entrance.  ■ Fishing is permitted in designated lakes only. Any lake may be closed to public access by Hardee County for management purposes, or in the event that access to the lake exposes the public to danger, by posting notice at the Park main entrance.

Sunshine bass bag limit: .................... 6  ■ Panfish bag limit: .......................... 20  ■ Crappie bag limit: .......................... 10  ■ Crappie less than 10 inches in total length must be released immediately.

Channel catfish bag limit: .................... 6

Motor vehicles may be operated only on designated roads, parking areas, and boat ramps.  ■ Vehicles may not obstruct designated roads, boat ramps and fire lanes.  ■ Swimming and float tubes are prohibited.

Watercraft are restricted to idle speed—no wake.

Summer Fishing Camps for Youth

The FWC is combating the tendency for today’s youth to disconnect from nature and the outdoors, through the Florida Youth Conservation Centers Network (FYCCN). This initiative is providing “Fishing and Basic Boating Skills Camps” (Fish Camps) throughout the state.  Fish Camps, for youth ages 9–15, combine teaching and practical application of angling and boating skills. An instructor provides a fish identification and anatomy lesson, and a law enforcement officer conducts a boating safety demonstration. The goal of Fish Camp is to establish individuals as life-long anglers and stewards of aquatic and fisheries resources, so they can benefit from a healthy, active connection with nature.

This unique program utilizes partners to expand the reach and cost-effectiveness of the camps. Plans are to establish at least one Fish Camp in each county. There are currently about 20 camps; two of the best established are the Ocala and Everglades camps. To locate a camp, or to help start a camp at a new location, email FYCCN@myfwc.com.

FWC staff developed and tested the Fish Camp model using Federal Aid in Sport Fish Restoration funds. Expanding the program relies on anglers, who voluntarily donate when buying a fishing license. FWC assists cooperators with startup costs for new camps and trains non-FWC trainers to ensure quality experiences. FWC staff also assists with evaluating camps to ensure positive impacts on campers’ environmental awareness, fishing skills, and long-term participation.

Fish Camps are fun and exciting for kids and what they learn will help them to live happier and healthier lives and become advocates for sustaining our environmental resources.
Lake Istokpoga, Highlands County: open to fishing.
- No bag limit for channel catfish.
- Nongame fish may be taken by cast nets, dip nets, seines, trotlines, set lines, bush hooks and wire traps. Refer to the Florida Commercial Freshwater Fisheries brochure.

Al Lopez Park Lake, Hillsborough County: open to fishing.
- Cast nets or minnow seines are prohibited.
- Panfish bag limit: .......................... 20
- Channel catfish bag limit: .............. 6
- Swimming, and taking of fish or wildlife with firearms are prohibited.

Bobby Hicks Park Pond, Hillsborough County: open to fishing.
- Cast nets and minnow seines are prohibited.
- Swimming and taking of fish or wildlife with firearms are prohibited.
- Gasoline motors may not be used on boats.
- Crappie bag limit: .......................... 10
- Crappie less than 10 inches in total length must be released immediately.
- Panfish bag limit: .......................... 20
- Channel catfish bag limit: .............. 6

Dover District Park Lake, Hillsborough County: open to fishing.
- Cast nets or minnow seines are prohibited.
- Panfish bag limit: .......................... 20
- Channel catfish bag limit: .............. 6
- Swimming, and taking of fish or wildlife with firearms or possession of alcoholic beverages are prohibited.

Edward Medard Park Reservoir, Hillsborough County: open to fishing.
- No person shall use any gear other than hook and line and rod and reel to take and possess game fish and nongame fish species.

- Days and hours of operation, park entrance and other user fees shall be designated by Hillsborough County and posted at the park main entrance.

Gadsden Park Pond, Hillsborough County: open to fishing.
- Cast nets and minnow seines are prohibited.
- Swimming and taking of fish or wildlife with firearms are prohibited.
- Gasoline motors may not be used on boats.
- Crappie bag limit: .......................... 10
- Crappie less than 10 inches in total length must be released immediately.
- Panfish bag limit: .......................... 20
- Channel catfish bag limit: .............. 6

Lake Thonotosassa, Hillsborough County: open to fishing.
- Trotlines may be used from sunset until 9 a.m. Sunday through Thursday.
- No bag limit for channel catfish.

Steven J. Wortham Park Lake, Hillsborough County: open to fishing.
- Cast nets or minnow seines are prohibited.
- Panfish bag limit: .......................... 20
- Channel catfish bag limit: .............. 6
- Swimming, and taking of fish or wildlife with firearms or possession of alcoholic beverages are prohibited.

Manatee Lake, Manatee County: open to fishing.
- Trotlines may be used from sunset until 9 a.m., Sunday through Thursday.
- Outboard motors more than 20 h.p. may not be used.
- No bag limit for channel catfish.

Middle Lake, Pasco County: open to fishing.
- Watercraft shall be operated at idle speed only.
- The following are prohibited within 150 feet of the boat launch site: swimming, taking of fish or wildlife with firearms, camping, or open fires.
- Bluegill and redear aggregate bag limit: 20
- Bluegill and redear sunfish less than 8 inches in total length must be released immediately.
- Crappie bag limit: .......................... 10
- Crappie less than 10 inches in total length must be released immediately.

Freedom Lake Park, Pinellas County: open to fishing.
- Cast nets or minnow seines are prohibited.
- Panfish bag limit: .......................... 20
- Channel catfish bag limit: .............. 6
- Swimming, and taking of fish or wildlife with firearms or possession of alcoholic beverages are prohibited.

Lake Seminole, Pinellas County: open to fishing.
- Trotlines may be used from sunset until 9 a.m.
- No bag limit for channel catfish.

Lake Tarpon, Pinellas County: open to fishing.
- Trotlines may be used from sunset until 9 a.m. Sunday through Thursday.
- No bag limit for channel catfish.

Largo Central Park Nature Preserve, Pinellas County: check entrance for open or closed status.
- Cast nets and minnow seines are prohibited.
- Swimming, taking of fish or wildlife with firearms and possession of alcoholic beverages are prohibited.
- Gasoline motors may not be used on boats.
- Crappie bag limit: .......................... 10
- Crappie less than 10 inches in total length must be released immediately.
- Panfish bag limit: .......................... 20
- Channel catfish bag limit: .............. 6

Walsingham Park Lake, Pinellas County: open to fishing.
- Cast nets or minnow seines are prohibited.
- Swimming, and taking of fish or wildlife with firearms or possession of alcoholic beverages are prohibited.
- Gasoline motors may not be used on boats.
- Bluegill and redear aggregate bag limit: 20
- Crappie bag limit: .......................... 10
- Crappie less than 10 inches in total length must be released immediately.
- Sunshine bass bag limit: .......................... 4
- Sunshine bass less than 10 inches in total length must be released immediately.
- Channel catfish bag limit: .......................... 6

Lake Crago, Polk County: open to fishing.
- No bag limit for channel catfish.
- Nongame fish may be taken by cast nets, dip nets, seines, trotlines, set lines, bush hooks, and traps as specified in Rules 68A-23.002, 68A-23.003 and 68A-23.004, F.A.C.

Lake Parker, Polk County: open to fishing.
- Wire traps may be used for nongame fish.
- No bag limit for channel catfish.
- Boats are restricted to idle speed—no wake.

Mosaic Fish Management Area, Polk and Hardee counties: open to fishing.
- Fishing is allowed only by daily permit issued by the FWC.
- All anglers must check in and out at the Mosaic creel station, the designated entry point, unless otherwise instructed.
- Days and hours of operation and quotas shall be as designated by the FWC and posted at the Mosaic creel station (typically Mosaic is open Friday through Monday). Fishing is permitted in designated lakes only. All other lakes and restricted areas, so posted, are closed to public fishing. Any lake may be temporarily closed to public access for management purposes, or in the event that access to the lake exposes the public to danger, by posting notice at the creel station.
- Unless otherwise specified, Mosaic FMA harvest restrictions are:
  » Black bass must be released immediately.
  » Sunshine bass bag limit: .......................... 6
  » Crappie bag limit: .......................... 10
  » Crappie less than 10 inches in total length must be released immediately.
  » Channel catfish bag limit: .......................... 6

(Continued on Page 26)
(Continued from Page 25)

» Fish may not be filleted, nor their heads or tail fins removed, until the angler has checked out at the Mosaic check station. Disposal of fish remains within Mosaic property is prohibited.

» Taking of fish and wildlife with guns is prohibited.

» Motor vehicles may be operated only on designated roads, parking areas and boat ramps.

» Vehicles may not obstruct designated roads, boat ramps, gates or fire lanes.

» Swimming and float tubes are prohibited.

» Rough fish may be removed from designated lakes by cast nets and minnow seines by permission of the landowner.

» Outboard motors more than 10 h.p. may not be used.

■ Regulations for individual Mosaic FMA lakes are as follows:

» Haul Road Pit:
  • Black bass 16 inches in total length or longer must be released immediately.
  • Black bass bag limit: ...................... 2

» LP2 West:
  • No boats permitted.

Saddle Creek Park, Polk County: open to fishing.

■ Cast nets are prohibited.

■ Channel catfish bag limit: ...................... 6

Tenoroc Fish Management Area, Polk County:

■ Fishing, hunting or trapping is allowed only by FWC permit. All anglers and hunters must check in and out at the Tenoroc Fish Management Area headquarters and deposit their valid fishing or hunting license with the custodian unless otherwise instructed. On water bodies where special-opportunity alligator hunts are permitted, participants may use guns and baits as specified in Rule 68A-25.042, F.A.C., when taking alligators. Permitted alligator hunt participants are exempt from the requirement to enter at designated points.

■ Days and hours of operation and quotas shall be as designated by the FWC and posted at area headquarters (currently Friday through Monday only). Fishing is permitted in designated lakes only. Lakes may be closed to public access for management purposes or if access to the lake exposes the public to danger, by posting notice at the Tenoroc check station office.

■ Discharge of firearms is limited to the FWC firing range or at FWC sponsored events.

■ All dogs must be leashed, except as authorized by FWC.

■ Unless otherwise specified, Tenoroc FMA harvest restrictions are:
  » Crappie bag limit: ...................... 10
  » Crappie less than 10 inches in total length must be released immediately.
  » Sunshine bass bag limit: ...................... 6
  » Channel catfish bag limit: ...................... 6
  » Black bass must be released immediately.
  » Fish may not be filleted, nor their head or tail fins removed, until the angler has checked out at the area headquarters.
  » Cast nets and minnow seines are prohibited.
  » No person shall have any gun under his/her control while under the influence of alcohol or drugs.

■ Public access is prohibited in areas posted as “Restricted” for protection of threatened or endangered species, or environmentally sensitive areas.

■ Motor vehicles may be operated only on named roads, designated parking areas, and fishing ramps as designated in the area use brochure.

■ Vehicles may not obstruct designated roads, boat ramps, gates or fire lanes.

■ Swimming and float tubes are prohibited.

■ Regulations for Tenoroc lakes are as follows:

  • Gasoline motors may not be used on boats.

» Lakes B and 5:
  • Boats are restricted to idle speed—no wake.
  • Black bass 16 inches in total length or longer must be released immediately.
  • Black bass bag limit: ...................... 2

» Picnic Lake:
  • Gasoline motors may not be used on boats.
  • Black bass bag limit: ...................... 2
  • Black bass 16 inches in total length or longer must be released immediately.

» Pine (formerly East and West Pasture Lakes) and Derby Lakes:
  • Boats may not be used.
  • Closed to fishing unless authorized by FWC permit for agency-sanctioned events except for anglers who have been certified by the U.S. Veterans Administration, U.S. Social Security Administration, by a branch of the U.S. Armed Services, or by a licensed Florida physician to be totally and permanently disabled and has obtained a permanent license issued pursuant to 373.561 (5) (b), F.S. or unless that person presents proof of acceptance as a client for developmental disabilities services by the Agency for Persons with Disabilities. One properly licensed person may fish if accompanying or assisting a permitted individual as described above.
  • Other than anglers described above, no one 16 years or older shall fish on Pine or Derby lakes unless accompanied by a child under 16 years of age.
  • Panfish bag limit: ...................... 20
  • Anglers may keep no more than 5 bluegill and redear sunfish 8 inches or longer in total length per day.
  • Derby Lake: Daily bag limit for black bass shall be five per day, only one of which may be 16 inches or greater in total length.

» Cemetery Lake:
  • Boats may not be used.
  • Panfish bag limit: ...................... 20
  • Anglers may keep no more than 5 bluegill and redear sunfish 8 inches or longer in total length per day.

» Long Lake:
  • Crappie bag limit: ...................... 25
  • No size limit for crappie.
  • Largemouth bass and sunshine bass: statewide size and bag limits apply.
  • No bag limit for channel catfish.

■ Bluegill and redear sunfish less than 8 inches in total length must be released immediately.

Palm Lake, St. Lucie County: open to fishing.

■ Gasoline motors may not be used on boats.

■ Channel catfish bag limit: ...................... 6
Frequently answered questions

Do I need a freshwater or saltwater fishing license or both?
In general, you need a freshwater license to take freshwater fish and a saltwater license to take saltwater fish, unless one of the exemptions specified on page 12 applies. If you are fishing in freshwater where no saltwater species live, you need a freshwater license and, likewise, if you are fishing in the ocean or Gulf you need a saltwater license. However, when you get into estuarine areas where salt and fresh water mix and fish of both types can be found, the issue becomes less clear. The interpretation of the rule is: You need either a freshwater, saltwater or combination license, or appropriate exemption, to take fish (take is legally defined as taking, attempting to take, pursuing, molesting, capturing or killing any fish, or their nests or eggs) by any means whether or not such actions result in obtaining possession of such fish or their nests or eggs. If you are using species-specific gear, your license should be appropriate (e.g., freshwater or saltwater) to the species you are targeting. Otherwise you need an appropriate type license to keep your catch and must immediately release any species for which you are not licensed. License requirements follow the species of fish, regardless of where they are caught. For example, if you only have a freshwater license and are primarily fishing for largemouth bass or bream (freshwater species) in a river, but happen to catch a red drum (a saltwater species), you must immediately release the red drum. An exception is you may take mullet from fresh water with only a freshwater fishing license, even though they are normally considered a saltwater species.

What regulations apply to frogs?
Pine Barrens treefrogs, Gopher frogs, and Florida bog frogs may not be taken from the wild. For all other frogs and toads, there are no seasons, bag or size limits and a recreational license is not needed. To sell frogs or take frogs to sell, a commercial fish dealers license is required. Frogs may be taken in accordance with 68A-26.002, Florida Administrative Code (FAC), including use of gills—provided gills are not specifically prohibited in the area. Florida Bog Frogs may not be possessed without a Scientific Collectors Permit.

What regulations apply to freshwater crayfish?
There are no seasons, gear, bag or size limits for freshwater crayfish, and neither a recreational nor commercial license is needed. It is illegal to take Florida’s state-listed crayfish (Panama City, Sims Sink and Black Creek crayfishes) and all cave-inhabiting crayfish.

What regulations apply to freshwater turtles?
Licenses and permits are not required to take a recreational bag limit of turtles in accordance with rules provided below. Freshwater turtles can only be taken by hand, dip net, minnow seine or baited hook.

Freshwater turtles taken from the wild may not be sold, but freshwater turtles raised on turtle aquaculture facilities or purchased from licensed vendors as captive bred stock can be sold pursuant to possession and take limits in accordance with 68A-25.002 FAC. Snapping turtles, cooters, and map turtles may not be taken from the wild because of similarity to Alligator snapping turtles, Suwannee cooters, and Barbour’s map turtles, respectively. Additionally, Alligator snapping turtles, Suwannee cooters, Barbour’s map turtles, and Striped mud turtles from the Lower Keys may not be taken from the wild or possessed without a Scientific Collectors Permit.

The following species have a possession limit of two: loggerhead musk turtles, box turtles, Escambia map turtles, and Diamondback terrapins. For all other freshwater turtles, take is limited to one turtle per person per day from the wild, except for those with zero take allowed as described in the previous paragraph. Freshwater turtles can only be taken by hand, dip net, minnow seine or baited hook. Many freshwater turtle species may be taken year round, but softshell turtles may not be taken from the wild from May 1 to July 31. In addition, collection and possession of freshwater turtle eggs is prohibited without a permit. You may transport no more than one turtle at a time, unless you have proof that all turtles were purchased legally (receipt indicating the purchase date, quantity and species of turtles acquired, the name and address of supplier, and license identification number of supplier), an importation permit from the FWC for turtles being brought into Florida, or a valid Aquaculture Certificate of Registration from the Florida Department of Agriculture and Consumer Services (FDACS: FloridaAquaculture.com). Red-eared sliders may be harvested without a permit but not possessed alive without a Conditional Species license or permit. Those in possession of a valid Aquaculture Certificate of Registration and restricted species authorization from the FDACS (FloridaAquaculture.com) may culture and sell red-eared sliders, but only to out-of-state recipients or Floridians who have a valid Conditional Species license or permit. However, certified turtle farmers that buy red-eared sliders for direct retail sale must have a License to Possess Class III Wildlife for Exhibition or Public Sale (ESC). Conditional species information is at MyFWC.com/license/wildlife/nonnative-species. ESC license information is available at MyFWC.com/license/captive-wildlife/applications/. Rules subject to change; see FLrules.org for the latest.

What regulations apply to clams, mussels and other mollusks?
Regulations governing taking and possession of freshwater mussels are covered by 68A-23.015 FAC. In summary, “Taking” live or dead freshwater mussels for the purpose of sale, as well as “selling,” is prohibited. Bag Limit: No person shall take more than 10 freshwater mussels, or 20 half-shells of the families Unionidae and Margaritiferidae per day. Additionally, no person may possess more than two days’ bag limit (20 individuals, 40 half-shells) of any mussels of these families. Any deviation requires a permit from the Executive Director, in accordance with 68A-9.002 FAC (see illustrations, page 13).

Freshwater mussels from families other than the two mentioned above, such as Asian clams, may be taken for bait or personal use. No recreational license is needed.

Mussels may only be taken by “hand-picking.” Use of brailles, crowfoot bars, or other mechanical methods is prohibited.

What regulations apply to harvesting fish for home aquaria?
Rules and regulations for recreational take and possession apply. You cannot be in possession, nor may your aquarium contain more than these limits. Legal methods of collecting and license requirements also apply. You need a freshwater fishing license to take (defined as “taking, attempting to take, pursuing, hunting, molesting, capturing, or killing any freshwater fish, their nests or eggs,” by any means, whether or not such actions result in obtaining possession of such freshwater fish or their nests or eggs”). Avoid taking Florida’s endangered species. A list of them can be found at MyFWC.com/WildlifeHabitats.

How do I use total length and girth to estimate bass weight?
When you don’t have a scale, you can use total length and girth to get a rough estimate of a bass’ weight. Use the following formula: Total Length (in inches) squared, times girth (in inches) divided by 1200. For example, a 22” long bass with a girth of 15” would weigh about 6.1 pounds (22 x 22 x 15 / 1200 = 6.1). See MyFWC.com/fishing/freshwater/fishing-tips/bass-weight-calculator/ for an online calculator.

How to measure your catch

Measure Girth around the fattest part of the fish
Measure Total Length with mouth closed and tail squeezed together
Florida’s freshwater fish—fun to catch, good to eat & healthy too!

Why eat fish?
Eating fish may help reduce your risk of heart attack and stroke. Fish high in omega 3 fatty acids—a type of fatty acid that supports fetal, infant and child brain and eye development—are good for mothers and children.

How much should I eat?
Adults should eat about 8 ounces of fish each week, and women who are pregnant, or breastfeeding, should eat 8 to 12 ounces (cooked weight) of fish per week. Eating a variety of fish has the most benefit.

What about mercury exposure?
For most people, the risk of eating mercury-exposed fish is not a health concern, but developing fetuses and young children are more sensitive to the effects mercury has on the brain. Women of childbearing age and young children should eat fish with low mercury levels. Mercury can’t be cut away, cleaned or cooked out of fish.

Basic Guidelines for Eating Freshwater Fish

The following Basic Eating Guidelines provide general advice to anglers from all untested fresh waters in the state. For more detailed guidance for all fresh waters, consult the Florida Department of Health publication Basic Guidelines for Eating Freshwater Fish (http://bit.ly/FishAdvisories) or call 850-245-4250. You can search for guidelines for specific water bodies at https://dchpexternalapps.doh.state.fl.us/fishadvisory/. (Fish illustrations by Duane Raver, Jr. and Diane Rome Peebles)
