

# Black Bass Management Plan - Technical Assistance Group (TAG)

---

The Technical Assistance Group (TAG) Charter explain their purpose as to provide guidance for development of a Long-Term Black Bass Management Plan. All meetings will be posted two weeks prior on our agency calendar, the meetings are open to the public. The TAG will not be making final decisions, it is assistance to the Florida Fish and Wildlife Conservation Commission's Division of Freshwater Fisheries. Team members represent diverse aspects of public interest in bass management and are asked to accurately represent those groups in addition to their own personal views. FWC staff will handle logistics and provide any supporting info needed. The term for this initial TAG is one-year and plans are for at least quarterly meetings.
