

**Florida State Wildlife Grants  
Final Review Form**

The final review builds on the previous steps in the project review process to identify those proposed projects that most warrant funding. Final reviews are used to determine which project to recommend to the Executive Director for funding. Because of the Sunshine Law, an applicant may request information about final reviews. While every effort will be made to ensure reviewer anonymity, disclosure of reviewer names may be legally required. Your scores and comments are valuable to the Florida's Wildlife Legacy Initiative as projects are considered for funding.

**Project Name**

**Reviewer Name**

**Date**

Please score the proposed project using the questions below. Questions 1 and 2 are based on a 1-5 scale, where 1 is poor and 5 is excellent. Question 3 is the average technical review score received by the project out of a highest possible score of 50.

Please enter your total score for all three questions next to "total project review score." The highest score possible is 60.

Space is provided on the second page for you to further explain the score you give this proposal.

---

**Overall Evaluation**

1. How well does this project further Legacy's goals and its efforts towards protecting SGCN and priority habitats?
2. How likely is this approach to succeed in addressing a long-term conservation need and in fulfilling the project's objectives, in a timely and cost-efficient manner, while incorporating partners?
3. What was this project's average technical review score?

**Total Project Review Score**

Please use the space below to further explain the score you give this proposal, especially as regards comments and concerns raised about this project during the review process.
